

Ellis Fischel Guest House

University of Missouri - Columbia

Location

Columbia, Missouri

Construction Completion

2001

Construction Cost

\$2 million

DMA Services Provided

Architecture

Structural Engineering

The guest house, a facility for families of hospitalized of relatives, is a 16,000 square-foot lodging facility and provides a convenient and comfortable haven, a “home-away-from-home.”

The facility includes twelve guest rooms with complete support areas including laundry room, living room, TV area, library, kitchen, dining rooms, manager’s apartment and counseling rooms. The project was planned to allow for the future addition of up to twelve additional guest rooms and common areas. David Mason & Associates provided architectural and structural engineering services for this project from preliminary design through construction phases.
