

Boeing Leadership Center

The Boeing Company

Location

St. Louis, Missouri

Construction Completion

1999

Construction Cost

\$45 million

DMA Services Provided

Civil Engineering

Structural Engineering

This \$45 million facility includes a learning center (seminar/classroom building), three dormitories containing workout rooms, multi-purpose areas, and a cafeteria overlooking the Mississippi River. The site, located on the 300-acre DesLoge Estate in north St. Louis County, contained several existing buildings, including a carriage house, main residence, and ballroom. These buildings were renovated to provide a complete corporate learning/retreat area.

David Mason & Associates provided civil engineering design of infrastructure and site improvements, and structural engineering for the three dormitories and related facilities.

Special considerations for construction means and methods were required to the use of special "tunnel" form work for the lodge building construction.
