

## Delmar Avenue Streetscape

City of St. Louis, Missouri

*Location*

St. Louis, Missouri

*Construction Completion*

2003

*Construction Cost*

\$3 million

*Area*

4,700 ft

*DMA Services Provided*

Civil Engineering

Surveying Services

The “Loop” is the area’s diverse selection of specialty shops, award-winning restaurants, and the *St. Louis Walk of Fame* attracts people of all ages. A major portion of the area is designated as a Historic District on the National Register of Historic Places.

This project extended from the City of St. Louis limits near Skinker Boulevard to DeBaliviere Avenue, about 4,700 feet. Expanded sidewalks for public spaces were created, and supplemented with site furnishings, lighting, landscape and street greenery, along with special sidewalk pavers and materials. A transit plaza was also developed for MetroLink/Bi-State bus and trolley connections. David Mason & Associates teamed with Wallace, Roberts & Todd to provide street and drainage design, utility adjustments and relocations, and all survey work for the Delmar Avenue Streetscape project.
