

## Interstate 294 Widening/Reconstruction

Illinois State Toll Highway Authority (ISTHA)

---

*Location*

Chicago, Illinois

*Construction Completion*

On-Going

Construction Cost:

\$24 million

*DMA Services Provided*

Civil Engineering

Structural Engineering

Surveying Services

David Mason & Associates provided structural services for the replacement of Sanders Bridge for additional capacity. DMA provided the drainage design and utility coordination. DMA surveyors provided topographical surveys and boundary surveys for right-of-way stakings.

The overall project consisted of reconstructing the Tri-State Tollway, (I-294) from Mile Post 49.0 to Mile Post 51.6, Illinois State Toll Highway Authority (ISTHA). Additional lanes were added, intersections reconstructed, bridges replaced, and intersecting roadways were upgraded.

This phased construction project required unique problem solving for new relocated and upgraded drainage systems, wetland detention basins and bioswales.
