DMA Services Provided

Creation of GIS Guidelines
Civil Engineering

This project consisted of the development of a Technical Guidance Manual for the Metropolitan Water Reclamation District of Greater Chicago (MWRDGC). This manual was produced in order to provide future consultants with standards for planning criteria, data collection and evaluation tasks, and detailed watershed studies.

David Mason & Associates provided GIS exhibits to assist in the establishment of the proposed standards. In addition, DMA coordinated GIS shape file acquisition for future use in watershed studies for MWRDGC.
