Peer Review

Wal-Mart Stores, Inc. became the world's largest company by building stores in suburban and rural areas. Recognizing that the customer base in urban areas wanted the same consumer choices as the suburbs, Wal-Mart began to focus on urban markets and targeted the Chicago metropolitan area.

David Mason & Associates began its relationship with Wal-Mart after a lengthy interview and qualification process. DMA participated in Wal-Mart's Consultant and Contractor training classes in order to learn their processes, as the design of Wal-Mart stores is led by civil engineers. DMA is one of only five pre-qualified engineering firms for the Northeast Illinois and Northwest Indiana region. During DMA's first year as a prime consultant for the Company, DMA has completed over 15 projects for Wal-Mart, Inc.

DMA provided the following services:

- Site Development
- Traffic Engineering
- Permitting
- Construction Administration
- Construction Inspection for the SWPPP (Stormwater Pollution Prevention Plan)
- Peer Review
- Surveying
- Structural Engineering
