Mascoutah, Illinois

*Construction Completion*  
1997

*Construction Cost*  
\$8.7 million

*Square Footage*  
53,000

*DMA Services Provided*  
Structural Engineering

Mid-America Airport serves as St. Louis Region's second full-service commercial airport as a reliever to Lambert International Airport. The Airport is located in St. Clair County, Illinois and provides state-of-the-art facilities for passengers, traffic, and cargo, including a foreign trade zone, and an adjacent 800-acre industrial park.

David Mason & Associates performed the structural engineering for this two-story, exposed structure, four gate terminal complex. This unique design included parallel chord, curved barjoists, and a vaulted central clearstory.
